Seven Hundred and Fifty Men Engaged in the Strike.

### No Attempt to Run Cars To-Day and No Disturbance.

#### A Return to the Trip System Precipitate i the Event.

The long expected tie-up of Descon Richardson's horse-car lines, in Brooklyn, was consummated this morning, when all the drivers, conductors, stablemen and other employees, numbering about seven hundred and fifty, went out in a body.

The strike was precipitated by the issuance of the following circular, yesterday:

or the Ionowing circular, yesterday:

To the Employers of the Atlantic Avenue Batteoid Company of Brooklyn:

Stychapter 579 of the Laws of 1887 of this
State, it is provided that "ten hours labor, to
be performed within twelve consecutive hours,
with reasonable time for means, shall constitue
a day's labor in the operation of all street, surface and elevated railroads owned or operated
by corporations incorporated under the laws of

By section 2 of said act it is provided that:

"It shall be a misdemeanor for any officer or agent of any said acqueration to exact from any of its employees more that ten hours labor, the same to be performed within twelve consentive hours; with not less than one half hour for dinner, constituting a day."

You will please take notice that every officer and agent of the Atlantic Avenue Railroad Company is under instructions to comply strictly with the provisions of the above law; and that you are not "permitted to work any longer period at your own request, for additional compensation," with the consent of the Company.

For the services of conductors and divivers compensation is and will be made for the number of trips run daily as heretofore, until further notice, in accordance with the agreement of Jan.

17, 1888; and every employee of the Company who is now voluntarily performing more than ten hours, labor inside of twelve consecutive hours, and who does not wish to continue the same, is hereby notified to so inform the foreman of the depot at which he works, or the Secretary of the Company, and his desire will be at once complied with. Respectfully,

WILLIAM Richardson, President.

This circular was posted up in the various depots. It is said that the foremen in the depots tried in vain to get the men to sign a paper setting forth that they were willing to work more than ten hours a day.

The posting up of the circular was soon followed by an order to swing the men, or in other words, put them at work on trips. The men acquiesced without a murmur, but they knew well how it would turn out.

Instead of making their customary \$2 for a day's work they found that on the trip system they had only made an average of \$1.75

These trips constitute a day's work. The men are paid so much per trip, a fractional part of \$\frac{1}{2}\$, the regular day's wages. This, at the first glance, would seem fair: but the men are not allowed to work the full number of trips, and, therefore, they make less money than heretofore.

The rumor was investigated by an Evening World reporter. The drivers say they have nothing whatever to complain of. A trip was dropped from their schedule last Monday which gives them two hours less work per day than they had previously. They now work about nine and one-half hours a day.

An officer of the Society for the Prevention of Cruelty to Animals called at the office this morning to learn if the horses were being cared for. He was informed that the men had offered to take charge of the animals, but that when they attemped to do so they were ordered out by the leaders.

The cars on the other lines running near those of the Descon's Company were jammed with belated passengers this morning, and it is likely that the other companies are correspondingly happy.

It is estimated that nearly fifty thousand people, regular passengers on the line, have been discommoded by the stoppage of the cars. The travel is heavisst on the Fifth and Seventh avenue lines.

I am informed that threats have been made that any attempt to operate any of the Company's lines will be obstructed and prevented by force.

It is our intention to proceed to operate the same with the least possible delay. It becomes my duty to notify you, which I now do, that this Company denands of the city protection for its property, and that it will hold the city of Brooklyn responsible for any loss or damage which the Company may suffer by reason of lawless acts. Very respectfully yours.

Similar letters were sent to Commissioner of Police James D. Pell, calling for police protection, and to Clark D. Rhinehardt, Sheriff of Kings County.

The Press Committee of the Local Assembly representing the 250 men employed on the Fifth avenue and Twenty-third street line stated to an Evening World reporter the grievance of the men.

They said that they tie-up was ordered with the unanimous consent of every man in the Assembly, and was not the result of any

grievance of the men.

They said that they tie up was ordered with the unaniurous consent of every man in the Assembly, and was not the result of any order from an Executive Board.

The men are very bitter against Deacon Richardson, and they also complain of the hard treatment which they have to undergo at the hands of Head Foreman Doercher.

Not a straight car was run yesterday. They were all trip cars and \$1.71 was the highest day's pay made. The 29 cents per day which the men would lose means considerable to them and they concluded not to stand it.

The men allege, too, that besides cutting down their pay the Deacon forced them to actually work twelve hours. One man made three trips in the morning and swung two hours. Another three trips was made in the afternoon, thus taking twelve hours of the main's time for his money. The men claim that they have made more concessions to Deacon Richardson's lines than were ever made to any others in New York or Brooklyn.

It is a growing belief that the strike was expected by the Deacon and that he has prepared for it.

This is borne out by the fact that early this morning, before the strike was generally known, gaugs of new men appeared at the different stables.

The old men are just beginning to tumble to this fact, and there may be music before long. The Deacon will advertise for 500 "Americans" to-morrow to operate his cars,

"That's all there is in the matter, and it is a very natural ending to such a silly and puppy-like love affair."

It was learned that Sadie before she went away yesterday told one of her friends in the store that although she didn't care much about young Barrett, she felt that if he died she would be responsible for it.

"She is a strong Catholic," said the Superintendent, "and performed her religious duties regularly.

Sadie's father, who died five years ago, was for a long time employed as engineer by Hegeman & Co.
Sadie herself began work there when she was only eight years old, and when she was put to work wrapping up pills she was so little that they had to put a box on her chair to bring her up to the level of the table.

She has been working there ever since, and after several promotious reached the position of cashier, and was the prettiest of the three young ladies who hold that position. She has been the principal support of her mother, who only recently secured the position of janitress at the flats where they now live, and was held high in the estimation of her employers, who are the estimation of her employers, who are ready to take her back whenever she wants to return.
